HAMSA SIVA SOHAM

Aquarius 2007 Kumbha

OM uttered forth,
before prayers, after prayers
and during prayers
eliminates impediments
on the path to self-realization.
OM helps unimpeded flow of energies
and bestows the related joy.
OM is the key to progress 'here' and 'there'

Therefore utter OM and listen.

K. Parvathi Kumar

Invocation

May the Light in me be the light before me.
 May I learn to see it in all.
 May the sound I utter reveal the light in me.
 May I listen to it while others speak.

May the silence in and around me present itself,
 The silence which we break every moment.
 May it fill the darkness of noise we do,
 And convert it into the Light of our background.

Let virtue be the strength of my intelligence.
 Let realisation be my attainment.
 Let my purpose shape into the purpose of our earth.
 Let my plan be an epitome of the Divine Plan.

May we speak the silence without breaking it.
 May we live in the awareness of the background.
 May we transact light in terms of joy.
 May we be worthy to find place in the Eternal Kingdom OM.

Prayer for the Year

Wash Karma in space.
On the deep blue slate
paint ever-elevating colours,
ever at the feet of the Master
in the Vaisakha valley.

Message of the Month of Aquarius

Once again we enter Aquarius. The Sundays of Aquarius are special. Sun transiting Aquarius brings in Aquarian energies, more so on Sundays. Traditionally Sundays in Aquarius are considered most sacred. The planet Uranus transmits its energies through Sun, and Uranus is an inter-penetrative energy. It penetrates to cause the needed changes to attune the beings to the Aquarian Age. Mondays in Scorpio, Thursdays in Sagittarius, Fridays in Leo are considered sacred.

Uranus in Aquarius proposes transparency. Transparency inaugurates the descent of a greater measure of life. Transparency is the result of absence of density. The energies of Uranus can be invoked through contemplation in the heart centre, which is essentially the Sun centre. The energy of Uranus, when it stimulates the heart centre, brings in significant changes into the blood stream and causes revolutionary changes in the blood quality. Through Prana treat Yoga is inaugurated.

Master CVV, the Aquarian Master, presides over this activity. In him the ray of Uranus is stimulated and it led him to experience the universal consciousness. It transmits the Uranian energy to those who invoke it. It enables quicker change in the constitution of Man and lifts him into transparent existence, which is called etheric existence. The month of Aquarius is an annual opportunity to lift oneself up into the etheric plane.

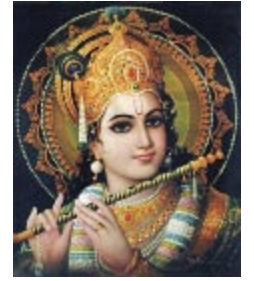

Message of the Teacher

Four Ways

The ones who are fulfilled in the material are the ones who pursue the spirit. They are the true seekers. There are other premature ones who are not fulfilled of the material splendour and who jump into spiritual pursuit more out of emotion than out of reason. These are the confused ones. Inherently they need the material fulfilment but they try to pursue spirit only to decorate their egos. Such ones are lost in their confusion. There are yet others who have clarity; they want to fulfil themselves in the material and pursue in a single-pointed way material fulfilment. The first category and the last category are clear in their pursuits.

There is yet another category that seeks spiritual help for material fulfilment. They too have no confusion. Their prayers are not to experience God but to fulfil their material purposes.

Thus there are four ways amidst the mankind, the fourth kingdom.

Gîtâ-Upanishad

- Lord Krishna -

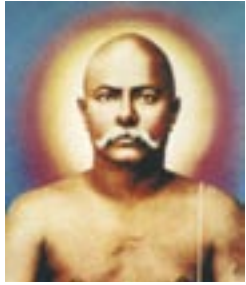

Demonstration of Selflessness

“The one who knows Me, who is self-born, self-willed joins Me at the time of departure from the body. He would not be reborn.”

The one who knows Brahman becomes Brahman say the Upanishads. Knowing here means experiencing. Knowing is not mere knowing information.

When one comprehends the Divine in action, he realises that the action of the Divine is one of pure goodwill. It is a complete demonstration of selflessness. Selflessness is the message, which needs to be translated into action. For the one who practices selfless action the sheaths of the body release. Released by the sheaths he joins the One Life, the One Truth and the One Existence.

The Lord Himself by self-will gets born to demonstrate this wisdom of selflessness. Since demonstration is better teaching the Lord does so from time to time.

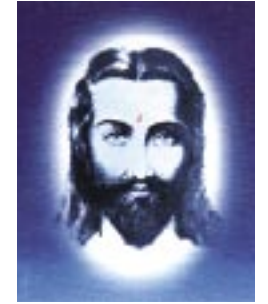

A Word from Master CVV

Try the Prayer

The Age of Aquarius brings in greater speed and the related tension. The tension leads to heart attacks. There would be increasing events of heart attacks in humanity. This is foreseen.

If any one of you has the tendency to tension or has the symptoms of heart attack, you can submit them to Me in your daily prayer and seek remedy. I shall initiate action to adjust the mental, vital and assimilative layers of your body and eliminate the potential seeds of sickness to the heart. It may look superstitious to you. Well, you can try the prayer and see how it works.

I came down to lift you up from death. Can't I handle the potential seeds that eventually lead you to death? Learn to pray the way I suggested. Learn to submit your personality problems in the prayer. I shall provide the needed psychological and even physiological adjustments. Practice and find the truth of it. Do not discuss it with your limited knowledge and logic. What I bestow on you is tangible and is beyond logic of your mind.

Lord Maitreya

Ever-seizing Workers

Keep learning to act. Learning is not just for the sake of learning. If you do so, it only decorates your personality, the ego. It does not help. If you translate such learning into action it initiates the necessary chemistry.

If you are thirsty you would drink for yourself. You don't wait till the water comes up to you. Thus if you are thirsty of Truth you would find the source of Truth. The thirst makes you move and cross even the impediments. If the thirst is not to the required degree you do not move swiftly. Many of you are thus not swift. When the thirst is absolute necessity, you cannot but run for it. Most of you are arm-chaired idlers but not ever-seizing workers. The Maitreya community consists of ever-seizing workers, but not imbecile idle philosophers. Workers go through the chemistry and reach the Truth.

The Will, the Way

Between the Will and Karma, which is stronger? is the question often asked. For the ordinary Karma is stronger than Will. There are extraordinary ones who nourish the Will, strengthen it and apply it.

Will is fire. When the Will is sufficiently developed, the related fire emerges and burns the impediments of progress. Will can be developed by attuning to the Divine Will on a daily basis. Will can be developed by precise rhythmic action, which requires honouring the time to the minute. Will can be developed by contemplating upon the sound Ram (the sound of Cosmic Fire). Will can be developed by contemplating upon brilliant orange colour with more red than yellow in it. Will can be developed by reading and thereby getting inspired by the stories of Great Ones of mankind.

Where there is Will, there is a way. Let not your will be deterred by the doctrines of Karma. My ashram is full of such ones who dare, who adventure and who inaugurate the new era. Attune your will to the Divine Will in any one of the ways stated above and conduct.

Work – Speech - Rest

There are a few who do not speak of us and yet work as per our doctrines. There are others who only speak of us and do not work. This second category is seen as traitors by us. By their irresponsible talks they unconsciously harm our community. We fear the talkers. We admire the silent workers. We generally consider talking as a dangerous play.

Those who work for us rest as per the demands of work. Generally, people work during the day and rest during the night. But our workers are at work as per the needs of work and rest at other times, be it day or night.

During the rest hours they sing, they dance and if necessary they sleep. Rest is not necessarily by sleep for them. Singing and dancing give them the needed rest. Sleep becomes the last priority of rest.

Message of Master E.K.

Associate with the Divine

The ones who develop insight and observe the divine in all that is also see their departure from the body with the same insight. Those who do not have this insight cannot see their departure and therefore die.

The one who observes and worships God the indweller of all finds Him at all times and in all places. He finds the indwelling God in the work that he daily does. Such a one tends to associate eternally with the Divine.

Shirdi Sai Saying

The Purpose

Verily I AM infinite and I AM beyond the qualities of My nature. I descend through the qualities to make My self visible as per the sincere wish of the devotees. I do this to lift up the devotees beyond qualities and unite with Me. To transform you into a Yogi is the chief purpose of My taking to form.

Sri Ramakrishna

The Divine

What is the conception of Brahman? It cannot be explained in words. If a man is called upon to give an idea of the ocean to one who has never seen it, he can only say "It is a vast sheet of water, a big expanse of water; it is water, water all around."

What is the nature of Brahman? It is without attributes, without motion, immovable, unshakable, firm as the Mount Meru.

Brahman is beyond mind and speech, beyond concentration and meditation, beyond the knower, the known and knowledge, beyond even the conception of the real and the unreal. In short, It is beyond all relativity.

Discipleship

The Errors of Astrologers

The calculations of astrologers are full of error. Many constellations which exist, are unknown and unseen. Yet they are potent in influence. There are undiscovered planets in our solar system whose energies affect our earth and which complicate the problems further. The energy which radiates from the earth itself is of paramount importance, yet astrologers make very little allowance for it. People are submerged in planetary and racial destinies, and astrologers do not give it due consideration. There are an infinite number of permutations possible, or complexities and relationships, due to the vast number of possible combinations existing. Hence it is impossible for the average astrologer to make accurate computations or to draw accurate horoscopes.

Astrology deals with the effects of extra-planetary energies upon the characteristics and qualities of a personality and with outer events, circumstances and environment. Effects are interpreted in terms of the individual, whereas the purposes of these influences are planetary and solar in scope. They only incidentally affect man. Modern astrology emphasizes the pre-vision factor and physical concerns and not the larger and higher relationships and objectives. It is with the life of God that astrology should deal, with the great Source, and not lay the emphasis upon the individual and his destiny.

Occult Meditations

Meditation 2

Bliss is in giving and not taking. Sun gives life. He is Man. Moon receives. She is Woman. Moon has phases of waxing and waning.

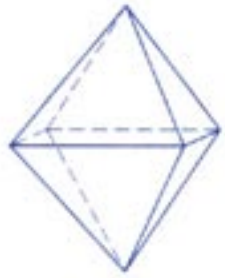

Commentary:

The disciple should learn to give and come out of the habit of receiving. This is a fundamental quality of discipleship, namely, to give more than to receive. Giving and receiving is in three planes. In all planes, learning to give more than receiving is a practice of discipleship. North Pole is distributive and South Pole is receptive; the former is the positive pole, and the latter is the negative pole. Distributing, sharing and giving lead the disciple to the centres above the diaphragm. Receiving leads one to the centres below the diaphragm. The centres above the diaphragm transcend man into Divine planes. The centres below the diaphragm lead man into these three tendencies. Man can be beastly, humane or Divine. The choice is his. But, for the disciple, the instruction is to release, to give, to share and to distribute.

The Scriptures define man and woman from the standpoint of giving and receiving. They do not identify the man and the woman by their physical appearance. Giver is man; receiver is woman. The former habit leads to liberation; the latter habit leads to limitation.

Sun is giver of life. Moon is receiver. Sun is therefore man; Moon is woman. The Moon wanes and waxes. The Sun does not. The one who lives in higher centres is stable. He does not totter. The one who lives in lower centres is unstable, shaky. He totters.

The disciple should note this phenomenon of nature and learn to be a giver.

Rudra

4. The begging Bowl of Rudra

This upper part of the head is also said to be the begging bowl of Lord Rudra.

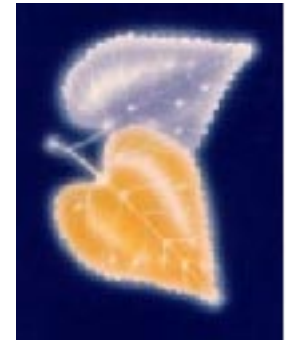

The begging bowl of the Lord is symbolic. One understanding is that His holding of the bowl is indicative of holding the Plan of the individual, as well as the universe. It is also indicative of His seeking from the beings the acts of evil and ignorance, so that the beings can live in His bliss while in creation.

GOD – Creator - Creation

God as Creator is His own idea. The Creator created the world as his idea. The idea relating to creation is a square from the Triangle or the Creator. The resultant creation is the fifth. The creation is a five-sided creation.

Idea is precipitated into concept and concept into shape. Shape created (precipitated) atom and atoms are shaped by the force with which they are shaped. Thus, bodies are created and ideas are filled with flesh and blood into beings.

The ideas we get are the beings who are to precipitate before us as beings (Masters), if properly received and kept sacred. If not, they escape and give place for further ideas which may be evil and which can be precipitated into devils or Dark Masters. Thus, mere entertaining ideas after ideas gives room for manifestation of the devils.

A figure, a colour, a sound and a smell with a number form the base of the idea and culture it into a being. This being helps us if properly formed - if composed of harmonious components. If not, it does harm. This is the esoteric meaning of Tantra Science.

Dear Children

I conclude with this month the fundamental information on planets and the Solar system.

We should know that our Solar system is not the solitary one but is a member of a group of Solar systems. 12 solar systems constitute one group. Every solar system has its 7 planets and their energies. There are planets that additionally assist more than one solar system.

There are groups of 12 solar systems whose energy function in our solar system through 12 months of the year. The solar energy is ruled by number 12 and within the solar there are 7 grades of energy as 7 rays, 7 planets, 7 days, 7 colors, 7 musical nodes etc.

Book Review

Book of Rituals

There is a practical key to the theoretical side of wisdom. Without this key the whole core of wisdom is not realized without the practical approach. There is a way of doing certain things in a certain manner which enables man to cross his own nature. This presupposes a science of doing things and that science is the "Science of Rituals. A ritual works as a sacrament to change and broaden the nature of man.

This book is a concise treatise on the Rituals of the Wisdom Religion. The work deals with the sacramental value of initiations and the changes brought to the student thereby.

Sri Dattatreya The Symbol and the Significance

Dattatreya is the Grand Teacher or "Guru principle" in the universe. The teachers in various planes are the manifestation of the one teaching principle who is referred to in the ancient Indian wisdom as Dattatreya. Dattatreya also exists in a form in all planes.

Dattatreya is the principle, which exists in all as the Teacher principle, as the friend, as the guide that leads one unto one's own source of Existence. Dattatreya is an Eternal Principle. Just like the World Teacher is the principle that guides the beings of this globe, Dattatreya is also a principle that incarnates as per the time and need in any plane of existence.

Tours of the Teacher

41st WTT Intercontinental Tour 2005

USA: Miami, 18th – 23rd November 2005

The November 2005, the city of Miami in general and the members of The World Teacher Trust were blessed with the visit of our beloved Master K. Parvathi Kumar, who in his untiring spiritual mission made his international tour that included countries of Europe, North America, the Caribbean and Asia. In this mission, he came accompanied by his wife and spiritual companion Kumari Garu, by his untiring and faithful collaborator Jesus, and by sister Sabine, who together are developing an immense and quiet spiritual work.

During his stay in Miami, a group living was organized from the 18th to the 20th of November in the Hotel Deauville of Miami Beach. It was a wonderful experience where our dear Master Kumar captivated us with his knowledge when he lectured about the subject *“Occult Meditation: The Temple and its Meaning”*.

He talked about the changes that are taking place in the country and the importance of being in tune according to the plan to open the path towards a new higher and balanced way. For this he said that we must accept the subtle message of nature and to use wisdom as a work element, like a rod to support in moments of crisis. This rod is in each one of us in our spine and by means of a regulated way of life, we can accept the change and know ourselves as image of God.

He continued to say that everything that there is in the Universe is in the human being as a macro and micro cosmos. The human being is a temple and to enter into it, it is required that we discover and open the different layers where truth hides about the brotherhood. The Masters say that the way to obtain it is through

breathing and by going inside the cave of the heart maintaining a rhythm.

He also spoke to us of how to complete the work of the fixed cross within us considering that our heart center is the south, the center of our forehead is the east, the west is the sacral center and the north, the coronary center. Another one of his great lessons was about the Solar System and the 12 signs of the Zodiac which are represented in the human body and his temple. Before initiating his series of questions and answers, he gave us a beautiful explanation on the meaning of the word MIAMI and the key sound MAYAMA. He also suggested to the Miami group to work with the seed sounds. *cont.*

2 Reports from WTT-Spain:

Muditha Center, Onda, Spain

In February 2006, during the meeting that took place to celebrate the inauguration of The WTT Global headquarters in Switzerland, our brother Paul brought some beautiful lingams, which he displayed to be sold.

We were impressed by the beauty and size of some of them, but we dared not to choose one without the knowledge of the aspects to be considered to select the most suitable one, so we asked the Master and his wife to honour us selecting one of them for our center. They accepted, and with much love and care they kept observing those that were there until they found one of their liking which we received with much love. But the surprise came later, when we were informed that the Master and his wife were coming to our home to install it. So it was, and on June 9th 2006 at 9 a.m. they performed the ritual for the installation of the Lingam at the Center, a ritual that filled us with joy and responsibility, too.

Since that day we perform the ritual according to the prescriptions in the book on Rudra sharing it with those who come to the center on Equinoxes and Solstices

Water Ritual in Onda

It was also during this visit to our home that we were informed about the changes regarding the Fix Cross meetings in Equinoxes and Solstices. According to the Scriptures, water is the manifestation on the physical plane of the ethers in the Solar and Cosmic planes. Water also represents the vital energy. The Water Ritual (Abhishekam) seeks the manifestation of the electric power from the invisible to the visible planes.

Rudra, the Lord of Vibration destroys the darkness of ignorance existing in the mortal beings and guides them towards the Light, allowing us to experience the Divinity and its activity. He is the Fire that manifests the three worlds, so He is the three fires (electric, solar and frictional).

The Lingam is a symbol. It is the main symbol of creation, it is the basis of every formation. It is the symbol of an egg, with the number potential of 10. This is a perfect number, and the egg is the perfect form for manifestation. The worship of the Siva Lingam is considered to be the worship of the Cosmic Egg. Such Egg contains all the creative intelligences conceivable. For this reason, the Vedic tradition worships the lingam. Whoever feels inclined towards this way of adoration can perform this ritual, and we invite you to share it with us. *Heartly*

Seminar on Silence at Bad Meinberg, Germany

At north Germany, near the city of Bad Meinberg, autumn displayed its fullness. Wide intense green fields surrounded by a great variety of trees, some of them grouped in little forests, others more or less lonely but next to some kind of vegetation or reduced groves. Little streams of timid waters, carpets of leaves designing natural mosaics on the moistened ground, meandering paths spread everywhere, colourful flowers of dusk and quietness. Wandering by these places one could find oneself tuning spontaneously with the seminar for which we had come to this geographic spot in Europe. Silence... the surroundings breathed silence, we could perceive silence in nature, the silence of falling leaves in October, the silence of the soft breeze caressing our faces, the silence of the bird's flight, the silence of the clouds, the silence of the sky, the silence of the earth, the presence of silence was surrounding us with deep vehemence and without complexes. No doubt the place was the suitable one to hold the Seminar on Silence proposed by our brother Hubert, in the presence of our beloved Master K.P. Kumar and his wife Krishna Kumari, from 12th to 15th of October. It was a different seminar, and this was what the organizers intended. The hall was arranged without an altar, chairs arranged in a half circle and people sitting on the floor closed the circle from both sides, where the Master and his wife were placed. The meditations were silent, except the invocations at the beginning. The Master spoke a little, investing 15 - 30 minutes in his teachings. It was intended that the participants remained silent the longest possible during the day, including the dining room during the meals. The first day we spoke relatively little, though as days passed the murmur was increasing, but finally, after a short discussion about the way we should behave in a seminar of these characteristics, a middle point was found where everybody accorded.

The first meditation took 90 minutes. There were several meditations in the morning and two in the evenings, some of them lasted 72 minutes and the others 48 minutes. We could experience how hard and difficult it is for us to reach silence, to walk in the depths of our beings where there is no word nor thought, where everything is Be-ness, Life and Light. We could realize how the activity of our minds is incessant, inexhaustible and impregnable. So we arrived at a rather enthusiastic conclusion that we should put more silence into our lives.

The Master published two booklets in German and English, one of them on "Silence" and the other one on "Change". They are compilations of statements from the Master, intended to stimulate and help reflection and meditation. The place where we were lodging was amazing and

cosy. It was a kind of hotel exclusively dedicated to congresses, seminars, courses and activities related with Yoga. The building was composed of seven floors, each one of them baptized with the name of a chakra. In the corridors and little lounges we could admire the pictures and sculptures of different deities (Shiva, Hanumann, Saraswathi, etc.), photographs of the Masters (Ramakrishna, Amma, Maharshi, etc.). The rooms were devoted to a deity, and had a corresponding altar. The vegetarian food was satvic, delicious, the rooms were comfortable... It is really a perfect place for this kind of events.

The last day we visited a sacred place called "Extern Stones" that reminded us of the Montserrat mountains because of their likeness in the "design" of their cylindrical and rough rocks and their greyish colour. There, the 130 participants meditated silently with the Master and his wife, surprising the people that were there visiting the place.

Extracts from the Teachings

Lecture During the Full Moon Hours of Scorpio, Part IV

Dr. Sri K. Parvathi Kumar

Fürigen Group Living, Switzerland, November 2005

I repeat: As long as we are blessed with respiration, so long we have the opportunity to walk inside, because the respiration is the link between the subjectivity and objectivity. Get in with the help of respiration, and transform within your being. That is what Scorpio offers as message. Otherwise, the activity of Scorpio is one of deceit, of conflict, one of tremendous passion. For Scorpions, the message is: Apply the passion upon God, be passionate about God, because that passion will lead you to experience God, to become one with God, because in Scorpio, the passion is at its height which can cause death to consciousness or death to personality. Two possibilities exist. Such is the power of Scorpio and mind you that we all carry that energy in us.

When Sun transits Scorpio, we need to utilise this aspect of the Sun that we try to get more and more into the inner side of the being. The inner side of the being is indestructible. It is called Akshara Purusha, the indestructible person. The outer person is called Kshara Purusha. He is destroyable. In each life we have different personalities, but it is the same soul. So, the inner is to be built, before the outer is destroyed. Before death visits us, we have to ensure that we don't die.

This work is to be done with the help of respiration. Respiration relates to air. Air relates to Aquarius. All Aquarian activity is a work with air, a work with air in you. Working with air outside is another aspect. Working with air in you is working with Aquarius. Then the air of Aquarius enables you to fly in the realms of light. Hanuman is a grand Aquarian Master. Then we have Master CVV, the seer Agastya, and the Hierarchy of Aquarius. They all give us the message: Work with air. Air links us from within to without and from without to within, and hence, as much as we

work with air, so much we will be able to move in and move up, so that we gain our real identity. It is called “regaining one’s own identity”. It is not that we are gaining it. We are only THAT, but we have lost that identity, and we try to regain it.

The Work of Saturn

That change is conducted by number 8. Number 8 speaks of change. 8th moon phase causes a change. Every time we meet 8, there is a change. Change is what is called ‘tables turn’, ‘accounts squared up’. There are occult meditations relating to it. From Sunday to Saturday, it is 7 days. Again Sunday comes. It is a new week, a new situation. The 8 should be seen as a number with the potential for change. When Saturn visits us, we should know that he brings some changes for the better. We have the tendency to crystallize our patterns, and every crystallisation is suffocation and death. Saturn visits us to destroy the crystallisation. Visit of Saturn is like the visit of the Master. That is why in Scorpio Saturn is the real Teacher, the real Master. He will enable us to gain flexibility, because Scorpio is a fixed sign, tremendously fixed on one’s own ideas, one’s own patterns, one’s own views, one’s own opinions, one’s own habits.

So, when Saturn visits Scorpio, his work will be to destroy for a fresh building. The visit of Saturn or transit of Saturn over Sun means that you have to reorganise your life for a better health. If Saturn transits your ascendant, he will attack the weaknesses of your personality, so that you change for the better. If he transits Moon, he attacks mental concepts. Likewise, in your natal chart, which planet may be transited by Saturn, he will come with better understanding relating to that aspect of your being, and you should learn to accept it and work with it. Saturn brings changes.

The Work of Uranus

Today Saturn is replaced by Uranus. He is causing such changes on global level with its transit through Pisces, so many changes, visible and invisible. We are in times, where we should learn to expect the unexpected, because Uranus does not give time for anything. He strikes like a lightning. That is the speed with which he changes. Especially in Pisces, Uranus works havoc

with waters, waters in you, waters on the planets. He has a one-pointed program to work on the waters on the planets and waters in the humanity, because he is a scientist. He would like us to evaporate all our emotional muddy waters and select the pure waters in the sky. Pisces stands for pure waters. Cancer stands for sea waters. Scorpio stands for waters in the ponds, in the wells, stagnated waters. Staying in Pisces, Uranus is working to raise all waters into the sky through a process of evaporation. Fresh waters are collected up there, so that they can come down again as rain.

And Uranus is in trine with Scorpio, because he is transiting Pisces. So, there is the activity of change in relation to emotions to gain the fresh water of devotion, dedication, so that the thirst for knowledge, the thirst for the New Age is quenched. Today we need to mind about the aspects Uranus makes with other planets and with other houses of the zodiac. Uranus is the king of the zodiac today. He is working at all levels, as I said, on the visible and invisible levels to cause very fast transformations. Get aware of the presence of the energies from Uranus, and accept the alchemy that he does with us. That continues to be so during his transit through Pisces. His influence on Scorpio is very high, also on Cancer. He gives beneficial results. And to Sagittarius, Gemini and Virgo, he has the aspect of squares and opposition.

Switzerland is ruled by Virgo, and by transiting Pisces, Uranus also touches Switzerland which is otherwise a very quiet, small nation on the planet. It also gets disturbed by opposition. By square, he is searching those nations which are ruled by Gemini and which are ruled by Sagittarius. This is how he is working through squares and oppositions. Then by his sextile and trine aspects, he helps building or rebuilding. All trines were earlier squares. Scorpio was in square aspect with Uranus, when he transited Aquarius. So, first he destroyed the undesirable, then he builds the desirable. That is the magical work, and he is supporting Mars in Taurus. The earthy sign Taurus is deeply affected by the energy of Mars now, and Mars is taking a close look at us. He is very proximate to Earth, and he is supported by a sextile with Uranus.

Scorpio – the Power of Passion

Scorpio is the sign where the Sun enters into the nether regions. It gets hidden. The matter completely hides the spirit. That is called death to consciousness. In the reversed wheel, it results in the birth of consciousness and death to matter or personality. Death of one kind or the other will happen in Scorpio. It is the choice of the truth seeker to what kind he wishes to die. We can die to spirit and we can die to matter depending upon our preferences.

Passion is a power in Scorpio. The passion can be applied towards matter and material power. It can also be applied towards spirit and the spiritual power. Either way it is power that works in Scorpio, because the Lord of Scorpio is Mars. Power and passion, they go together. Power in terms of spirit leads one to be a king initiate. Power of passion towards material leads one to be a criminal. That is why the worst criminals and the best king initiates are born in Scorpio. The secret gambling dens and the secret cave temples are found in Scorpio.

Jupiter entering Scorpio will enable expansion of consciousness. It will also enable expansion of material. For a mundane man, Jupiter enables material expansion. For a disciple, Jupiter enables expansion of consciousness. These are the possibilities of Scorpio. You are at the extremes of one thing or the other. Extremity in any direction comes from the power of passion. A Scorpion is never inbetween. Either he will soar like an eagle into the 7th sky or he will fall deep down into the nether worlds like a snake. This aspect in Scorpio is the power of Mars which is not a visible power. The power of Aries is a visible power. Scorpion power is invisible power. This power is not found outside, it is not obvious. It is hidden. It is this hidden aspect of the will that is chosen as the sacred aspect even for occult purposes. That is why Scorpion power enables us to get into a hide-out. In the objectivity, criminals find a hide-out. In subjectivity, the disciples can also find their own hide-out in them. The first four degrees of Scorpio relate to this power. It is a tremendous power. It is the power of the *Kumara* which is called the rod of power. The symbol relating to the first four degrees of Scorpio is the rod of power. This rod of power can be used depending upon the person who holds it or who handles it. The power in the hands of a criminal and the power in the hands of a noble king, either way it is power.

Frequently in Europe you find a symbol where you see a king on the horse holding a spear, killing the dragon. This is an important symbol to be meditated upon in the month of Scorpio, especially by the Scorpions. You will find in the “Spiritual Psychology” Occult Meditations that the tip of the rod of power or the tip of the spear carries a red sting. That red sting represents the killing of the passion. As we are now adequately advanced in our teachings, we should regularly work with these Occult Meditations. All these meditations relate to inner work, to occult work, to Scorpion work. It is a work in relation to the inner side of the being.

The Constellational Knowledge in Scorpio

The first four degrees in Scorpio are represented by a Kumara and also by a constellation called *Visakha*. The fourth quarter of the constellation of *Visakha* falls in Scorpio, and there you find this rod of power. So, during the first four degrees of Scorpio, we should contemplate upon the rod of power that kills the passion for material. It is called “killing the dragon” which is the dragon of material passion.

The next constellation in Scorpio is Anuradha. Anuradha means an upward moving creeper. The creeper moves upwards in a spiralic fashion. Creepers move up with the support of a pole. When you have a flower creeper, it needs the support of a pole. The pole around which the creeper moves upwards is the rod of power which has killed the passion. That is how killing one’s own passion leads one to move upwards in Scorpio. The creeper moving upwards the rod of power represents the power of Kundalini moving in a spiralic fashion. Otherwise, it remains a coiled serpent in Muladhara binding the being in passion. When the passion is killed, the serpent moves upwards. That is the message of Anuradha. The rod of power exists from Ajna to Muladhara. So, the creeper moves upwards, and only stops when it reaches Ajna. It does not stop in between. It is a non-stop express. That is the beauty of Scorpio. Either you are in Muladhara or in Ajna. That is all. There are no in-betweens for Scorpions. *cont.*

Paracelsus Health and Healing

Physician and Metaphysician

Comprehension of two aspects of the human body will greatly facilitate increasing sensitivity and clearer perception of its (body's) health condition.

The two aspects are:

- Accumulative mass of knowledge and information about the physical body, which is accumulated, down the ages by men of science and which is largely proven.
- A constantly growing understanding of the nature of the etheric body, of the etheric centres and of the transmission and circulation of energies of awareness besides the energies of life.

The medical profession may have to realize one subtle factor. The World War II tremendously increased the nervous sensitivity and also the capacity for the nervous reaction. This increased nervous receptivity is growing to abnormal levels, and the results are sad. The nervous apparatus of the average Westerner is unstable and is leading to much nervous disorder. The greater measure of mis-trust, doubt, suspicion, hatred, jealousy, fear, is found in the materially advanced societies of the West than in the other societies which are relatively poor.

The orthodox physician is more or less well informed of the physical anatomy of man while the metaphysical healer carries knowledge of the occult anatomy of man where the functioning of the force of intelligence and its quality is given greater emphasis. Man is the result of two streams of energy flowing through him: one is of life, the other is of light (awareness, rational thinking, acting, perceiving etc). Health is a product of right thought, right action and right food and sleep. The science of medicine finds its solutions when man as a whole is considered. That is, his attitude towards work, society, the thoughts he entertains, the food he takes in, the rhythm of sleep, action, exercise and food etc.

The physician and the metaphysician should necessary come together. Both have much to do together because the work of one penetrates into the other. The two are interdependent. The subtle and the intangible should meet the obvious and the tangible. This is the future. The metaphysician is helpless without the physician and vice versa.

More often the physician complains that the metaphysicians are charlatans. But charlatans also exist among physicians. They are few in numbers in both groups. They are to be avoided in any case. The sincere investigators that have immense love for humanity can be found in both groups. They should come together dispelling mutual fears to find sensible and complete solutions to meet the needs of human health.

Great Invocation

Let us form the Circle of Good Will.

OMNIA VINCIT AMOS.

From the South through Love
 which is pure.

From the West through Wisdom
 which is true.

From the East through Will
 which is noble.

From the North through Silence
 which is golden.

May the Light make beautiful
 our lives.

O Hierophant of our Rite

Let his love shine.

OMNIA VINCIT AMOS.

Let us form the Circle of the World
 Servers.

We bow down in homage
 and adoration

To the Glorious and Mighty Hierarchy,
 The Inner Government of The World,

and to its Exquisite Jewel,

The Star of the Sea -

The World Mother.

From the point of Light
 within the Mind of God

let Light stream forth

into the minds of men.

Let light descend on Earth.

From the point of Love
 within the Heart of God

let love stream forth

into the hearts of men.

May the Lord return to Earth

From the centre where the
 Will of God is known

let purpose guide the little wills of men,
 the purpose, which the Masters

know and serve.

From the centre which we call
 The race of men

Let the Plan of Love and Light
 work out

And may it seal the door
 where evil dwells.

From the Avatar of Synthesis
 Who is around

let His energy pour down
 in all kingdoms.

May He lift up the Earth to the
 Kings of Beauty.

The Sons of Men are one
 and I am one with them.

I seek to love, not hate.

I seek to serve and not exact
 due service.

I seek to heal, not hurt.

Let pain bring due reward
 of light and love.

Let the soul control the outer form
 and life and all events,

and bring to light the love
 which underlies the happenings

of the time.

Let vision come and insight.
 Let the future stand revealed.

Let inner union demonstrate
 and outer cleavages be gone.

Let love prevail.

Let all men love.
